

Laborers Training School  
Lead Abatement

**Time:** 24 hours

**Maximum Class Size:** 10 during classroom activities  
5 during hands-on activities

**Prerequisites:** None

**Course Description:** This course is designed to introduce the technical and regulatory information the participant must know in order to work safely, effectively, and efficiently on a Lead Abatement job. It introduces topics covered in the OSHA Lead Standard 29 CFR 1926.62 as well as California OSHA Lead Abatement standards. The participants become competent in lead abatement methods and work practices.

**Course Objectives:**

- Define environmental lead exposure and occupational lead exposure.
- List three examples of environmental exposure to lead.
- List four examples of occupational exposure to lead.
- Identify the melting point and boiling point of lead.
- List two ways lead poisoning occurs in children.
- List three lead hazards found in residential housing.
- List the three major areas of lead abatement.
- List the major responsibilities of a lead abatement worker.
- Explain why lead-based paints are used as coatings on surfaces.

**Classroom Rules and Procedures**

- All classes begin at 6:30 am and end at 3:00 pm
- Upon entering classroom, all participants must sign in and be seated by 6:30 am
- Class will consist of a combination of lecture, video, demonstration, coached group exercises, individual exercises and assessment.
- Students are required to report to class ready to work and maintain the provided PPE.
